(54) Title: ELONGATED DISPLAY FIBERS AND DISPLAYS MADE THEREOF

(57) Abstract: The present invention relates to an elongated display fiber (1) comprising an optical fiber body (2) having a plurality of pixel positions distributed along the length of said fiber (1). At least one light source (3) is arranged to selectively illuminate said fiber (1) from at least one end thereof. Addressing means are operably associated with said fiber for sequential addressing of one of each of said pixel positions. The display fiber (1) further comprises means for selectively causing said fiber (1) to emit light at said addressed one of said pixel positions. The present invention further relates to a display apparatus (11) comprising at least one elongated display fiber (1) according to the present invention.
